

The mighty Murray

The mighty Murray River is a place at everyone should love and respect.

It is a very unique and sensitive place.

There is wildlife everywhere you look and every step you take there are beautiful trees and bushes.

Respecting the river and its beauty is important because the water everyone lives on comes from the MARVELLOUS place.

The water gives the gift of life to not only human but animals as well.

Pelicans are amazing creatures that live on the water. The river is murky so what is underneath is unknown by any human.

There are logs, twigs and leaves floating on the bubbles of the calm water.

Pelicans flap their wings, giving them the power to hop one by one across the water.

The river is a wonderful place, full of different species.

People should all love, respect and care for the river and all of its beauty.

IF WE TAKE CARE OF THE RIVER, THE RIVER WILL TAKE CARE OF US!
