

The most beautiful things on Earth, trees

Most trees give you shade and some bear fruit.

Some have fresh new leaves and some have old crusty ones, but it doesn't matter what the leaves are like.

Every tree has something special or unique about it.

Some have pink and white blossoms and some are brown with only its branches for company.

Some are hollow and some are completely filled.

Every tree makes the whole place look like a wonderland.

Trees are one of the best things in the world!!
