

# The Murray River

The Murray River is a great place.

Pelicans swimming

Ducks catching fish and people having holidays on houseboats

It is very calm and peaceful.

A little duck dives under the river then, ten seconds later, it appears back on the surface.

A fisherman's boat sped past creating ripples on the undisturbed water.

A family is having a picnic in the cool shade of a huge tree

A duck is hiding in the hollow of a dead willow

The sun makes the water glisten like diamonds floating on a reservoir

This is the Murray River
